EXPERIENCE

JUNIOR ASSOCIATE DEVELOPER– Python/Django
Nextwebby mindpower LLP | Madurai
June 2026 – Present

Joined as a 3-month Python/Django Intern and continued as a Junior Associate Developer.

- Developing and maintaining web applications using Python and Django.
- Implementing backend logic, database operations, and application features.
- Working with HTML, CSS, JavaScript, Django, and SQL.
- Debugging issues and developing solutions based on project requirements.
- Gaining hands-on experience in real-world software development and team-based projects.
- Contributing to projects including event management/game platforms and web-based applications.

TECHNICAL SKILLS

Languages: Python, JavaScript
Web Technologies: HTML5, CSS3, JavaScript
Framework: Django
Database: SQL, SQLite
Tools: Git, GitHub

PROJECTS

Event Game – Django

- Developed a Django-based interactive event platform featuring 14 team games with automated scoring, team management, and winner tracking.
- Implemented game logic and scoring functionality using Python, Django, JavaScript, HTML, CSS, and SQLite.

ATS Resume Checker – HTML, CSS, JavaScript

- Developed a frontend application that evaluates resumes by matching candidate skills with job requirements and generating an ATS score.
- Designed the application to help users identify skill gaps and improve resume compatibility with job descriptions.
